

Kaaba architecture colouring

Notice straight edges, a cloth covering and a plain decorative band.

1 / COLOUR AND OBSERVE

The Kaaba is in the Grand Mosque in Makkah. Its cloth covering is called the kiswa. Use your own colours for this simplified activity sketch.

Simplified colouring illustration; not to scale. The band is plain original geometry, not sacred text. No door or Black Stone position is shown.

Find a straight edge. Find a rectangular area.

Point to them together, or mark them gently on the drawing. No worship instructions are included.

Kaaba architecture colouring

Use the short reading and drawing to check your observations.

2 / PARENT KEY, FACTS AND A BORDER

Reading answers

Covering: kiswa. City: Makkah.

The real covering uses black silk with gold and silver decoration. The drawing is not a colour specification or an exact mathematical cube.

Observation answers

Straight edges: any clear line along the block. A rectangular area: the large front face or a front-band panel. Perspective side faces are slanted, not flat-page rectangles.

Create your own border pattern

Use repeated shapes in the blank space. Your pattern is not a claim about the actual cloth.
