How to play Memory Pairs

A simple picture-pair game. Adapt the number of cards and pace to suit your family.

1. Choose a small set

Start with two to four matching pairs if you like. Use all twelve only if it feels comfortable.

2. Mix and place

Shuffle your chosen pairs. Place the cards picture-side down. Plain backs keep the pictures hidden.

3. Turn two cards

Take an agreed turn to reveal two cards. If the pictures match, keep the pair to one side.

4. Try another turn

If they do not match, turn them back. You can work together instead of competing.

5. Change or stop

Say what you noticed. Take a break, reduce the set, or finish whenever you choose.
